

# World Leading Telco Grade Cloud Security Solutions

**FIRSTWAVE**  
CLOUD SECURITY TECHNOLOGY

Cloud, network security and automation technology company FirstWave Cloud Technology created an intelligent carrier grade cloud security and orchestration platform for business that has been delivered through a Software as a Service (SaaS) model since 2004. More recently, FirstWave's specialists have helped to design and deploy highly performing and secure networks and orchestration solutions for some of the APAC regions most critical government, financial and technological institutions.

FirstWave's proprietary orchestration system provides the control of the cloud-based security platform that services over 450 premier enterprises. The platform offers a broad spectrum of cloud security and analytics technology solutions that, along with advanced mail, web and NGFW content controls, offers unified, integrated x-threat vector advanced malware protection technology solution for any business or enterprise moving to or operating in the cloud.

## Ready for the next wave of cyber threats

**FirstWave's Cloud Email Security** is a world-leading, Australian developed, enterprise grade and affordable cloud based email content security solution for any size business. It is a high-reliable, highly-scalable, richly-featured cloud email security service using innovative advanced cloud content security and analytics

**FirstWave's Cloud NGFW** service combines application awareness and deep packet inspection to give companies more control over applications while also detecting and blocking malicious threats. It is delivered as a high availability, high functionality, managed solution, and can be customised to meet high end, enterprise specific needs.

**FirstWave's Cloud Web Security** acts as your first line of defence against threats on the internet, providing complete visibility into internet activity across all locations (on and off corporate network), devices and users – blocking threats before they reach your network or endpoints.

**For over 10 years**, FirstWave's teams have been responsible for design, transition and deployment of cloud services in a customer's security environment. Our cloud integration experts provide customers with a proven deployment process that controls costs ensuring quick and pain-free cloud deployments.
